# CONNECTING UP OUTDOOR SPACES...

**Our Connekt outdoor canopy is one of the flagship systems within our extensive product range.**

We really love it here at Canopies UK and so do the many customers who've ventured down the Connekt route over the last 25+ years we've been installing it.

But why is it so popular?

- Could it be because of its modular design, which makes it incredibly versatile?
- Or maybe it's the fact there's no limit to how long it can be...
- ...or how far it projects?
- Or possibly the fact it's free-standing, which means there are no supporting posts in the middle and only one single post if you choose the Umbrella style?
- Or just maybe it's because it's maintenance free?
- And can be colour-matched to any RAL code?
- Or the fact it comes with a ten-year guarantee as standard?

**One thing's for sure, there are plenty of reasons to choose Connekt!**

## Who's it used by?

Connekt can be used in any environment. It's always been the ideal option for creating playground shelters for schools and hugely popular with:

- Nurseries
- Schools
- Colleges
- Plus, many other educational environments

At the last  
count, we'd installed  
**17,000**  
Connekt canopies across  
the country!

# ...IN MORE WAYS THAN ONE!

We've been manufacturing and installing this particular canopy since we first started out to enable our customers to:

1. Create sheltered areas they can use in all seasons.
2. Get more from their outdoor space.

On the last page, you'll have seen there are all sorts of reasons why Connekt is such a popular product. There are all sorts of ways you can use it too, here are just a few examples:

- Sheltered walkways
- Outdoor learning environments
- Dining areas
- Covered play areas
- Spectator and parent waiting shelters
- Sheltered entranceways
- Playground shelters for schools

## Need an umbrella?

We've got one that'll never get blown about or turned inside out by the wind. And it won't fail to protect you from the rain, snow or other wintry weather either. It'll also protect you from the sun's harmful rays too.

Our Connekt Umbrella system is exactly that, a canopy with just one supporting post in the middle and a wide Glass Reinforced Plastic (GRP) umbrella-shaped roof that's wide enough to provide plenty of shelter underneath.

Join the growing number of schools and other educational environments **Connekting up their outdoor space!**

For more details about Connekt or to discuss your outdoor canopy requirements with us, contact us on [info@canopiesuk.co.uk](mailto:info@canopiesuk.co.uk) or **01254 777 002**.
