# SERVING UP A NEW DINING EXPERIENCE...

**The Cantabria  
is transforming the  
restaurant experience!**

We've installed countless Cantabria canopies at venues including the exclusive Savage Garden rooftop bar at the DoubleTree by Hilton Hotel London - Tower of London.

**Most of the outdoor canopies within our product portfolio are market-leading, but none more so than our Cantabria, which is single-handedly redefining how restaurateurs do business.**

Hugely stylish and incredibly popular within the hospitality world, nothing compares to the Cantabria and its many features, which include a head-turning retractable roof that can be opened and closed at the touch of a button.

Not only is the system cutting-edge and highly functional, it's capable of instantly turning outdoor areas into unique, luxury wining and dining spaces that can be used all-year round.

Our customers love the Cantabria for all sorts of reasons, here are some of them:

- The durable aluminium frame, integrated guttering, waterproof roof and glass screens effortlessly combine to make a full enclosed, UV protected environment
- There's an extensive range of glass sides to choose from, which include fixed, folding and sliding, balustrade and internal
- The system offers 100 per cent protection in wind speeds of up to 60km/h when fully closed. In the finer months, the glass sides can be retracted, and come the cooler, wetter or more changeable weather, can be partially or fully closed
- The finished product looks incredibly stylish and is capable of instantly creating a focal point, giving venues that added wow factor
- The canopy is available in any length and projections of up to 10 metres for single units and 20 metres for twin units.

## Who's it used by?

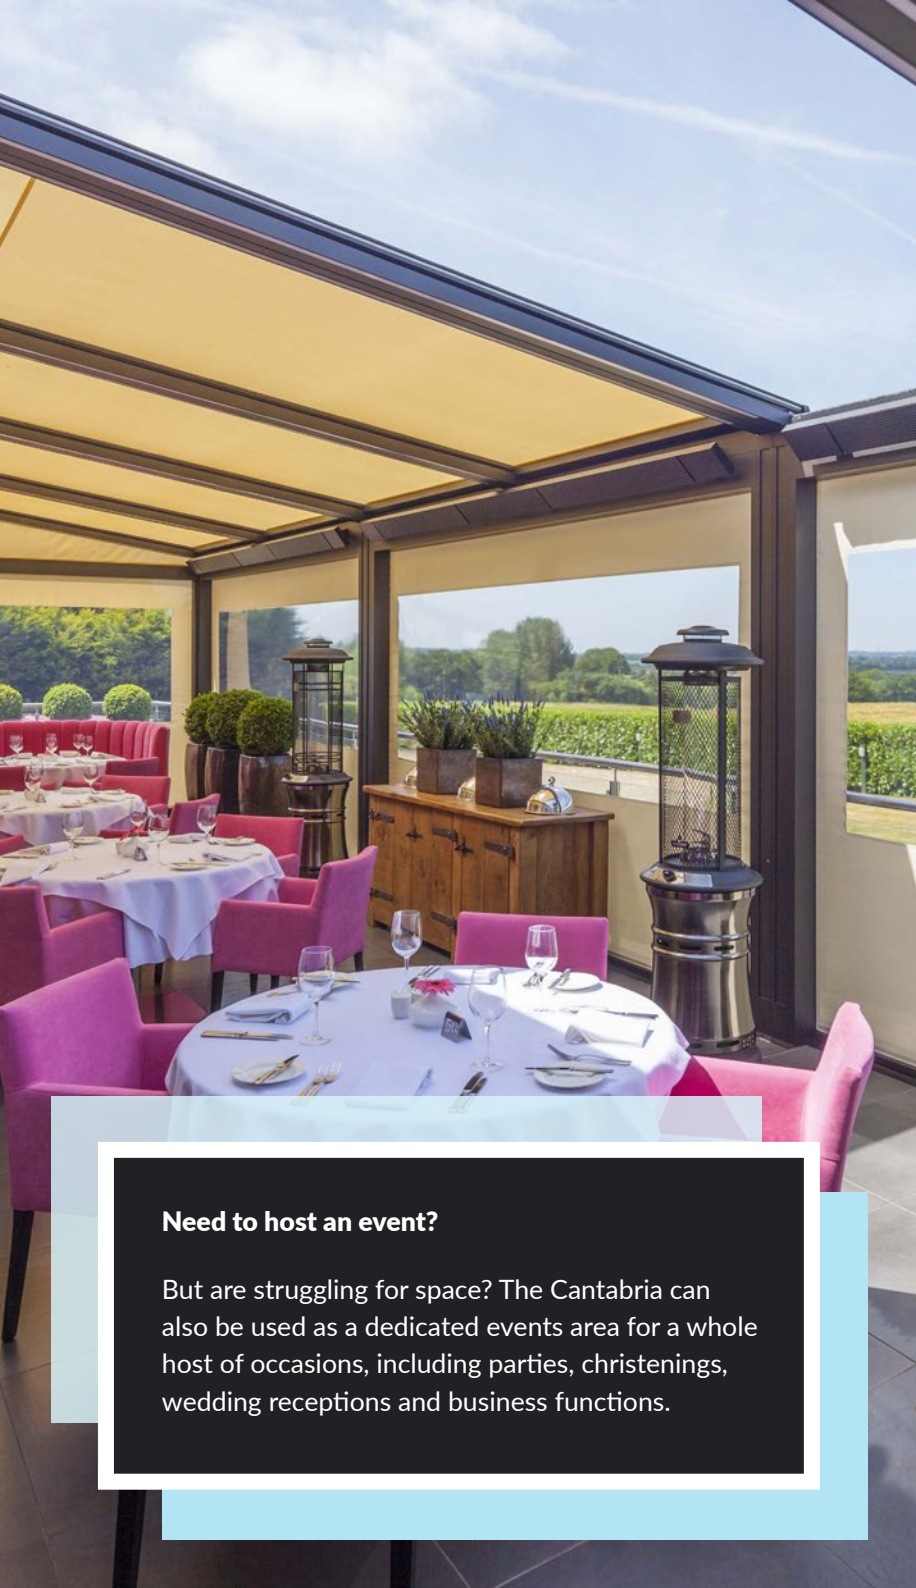

The Cantabria was initially created to provide the hospitality world with a guaranteed way to meet the growing demand for alfresco dining.

Restaurant owners who have installed the Cantabria have all been able to:

1. Use their outdoor space come wind, rain, snow or shine.
2. Cater for additional covers all-year round.

The Cantabria's become such a popular product in its own right and the benefits provided by these restaurant outdoor structures are so widespread, that we're installing the system in numerous industries, such as the education sector.

### Need to host an event?

But are struggling for space? The Cantabria can also be used as a dedicated events area for a whole host of occasions, including parties, christenings, wedding receptions and business functions.

# ....THAT REALLY ADDS UP!

The Cantabria may have the wow factor, but this isn't the only reason why it's being snapped by restaurateurs left, right and centre.

Compared to other restaurant outdoor structures, it also stacks up financially too.

Restaurants that install a Cantabria can generate up to 184 additional covers\* and an additional weekly revenue of more than £7,000.\*\*

Let's hear from a couple of restaurant owners who haven't looked back since installing a Cantabria:

*"The canopy on Wildside has been flawlessly designed to accommodate events throughout the year.*

*"Come rain or shine, guests can enjoy everything from drinks to private events in the space as the retractable canopy - designed and built as bespoke for Savage Garden - means that the terrace can be cosy and covered during winter, and the perfect suntrap come summer."*

DoubleTree by Hilton Hotel London, Tower of London

*"The Cantabria means our customers stay longer, as we can alter the configuration according to the conditions. We often close a couple of the wall panels to provide protection from the wind whilst opening the roof panels to varying extents to allow sunshine in some areas and shade in others.*

*"Interestingly the Cantabria has become a venue in its own right. Local people are using the canopy and we have hosted a few parties. We have groups lunching there and are serving more food than in the hotel restaurant.*

*"People admire the quality of the structure and it is great for staff to be able to react to ensure customer comfort by opening or closing the canopy at the press of a button and controlling the heaters too."*

The Garrack Hotel & Restaurant, St Ives Bay, Cornwall

\* Based on Friday and Saturday, 2 sittings per day.

\*\* Based on £40 per cover = £7,360.

Join the growing number of restaurants that are wowing their customers and boosting their profits.
