## Canopies for schools and colleges

Make more room for every term

# Extend your space

**Make more room for learning, dining, and socialising.**

Outdoor canopies are the affordable way for schools to get more use from their space. Canopy systems are designed around your specific needs to get the most from the space available.

# Why outdoor canopies?

The fast and affordable way to create multipurpose shelter

“Our parents wanted shelter and we wanted an outdoor break-out classroom. We now hold outside meetings, classes, and presentations, and use it for picnics!”

Matt Parkin, Lower School Principal  
Dwight School London

Getting outside for lunch, lessons, and breaktimes is a vital part of kids' wellbeing. But the British weather often gets in the way.

Canopies allow schools and colleges to extend their space and create outdoor classrooms and dining halls. Freestanding canopies create outdoor shelter from disused outdoor areas.

Safe outdoor environments are especially important post-pandemic. Creating outdoor space for your whole school to use is easier than you think. With canopies to suit your budget and payment plans available, we design the right canopy system for you.

## How the process works

1. We carry out a free site survey to discuss your canopy.
2. Our representative images show you what your canopy will look like.
3. We agree the design, quote, and set clear installation timeframes.
4. If required, we put you in contact with one of our partnered finance providers, Utility Rentals or Funding 4 Education.
5. We use site specific calculations to make sure your canopy is safe for the location.
6. Your canopy is manufactured, and our team of fitters install it on site.
7. Installation is carried out by our skilled fitters, in or out of term-time.
8. We leave your site clean and tidy, and the canopy safe and ready to use.
9. Your canopy comes with up to 10-years warranty.
10. Your school enjoys the new canopy!

# Outdoor dining canopies

## Create multipurpose dining space

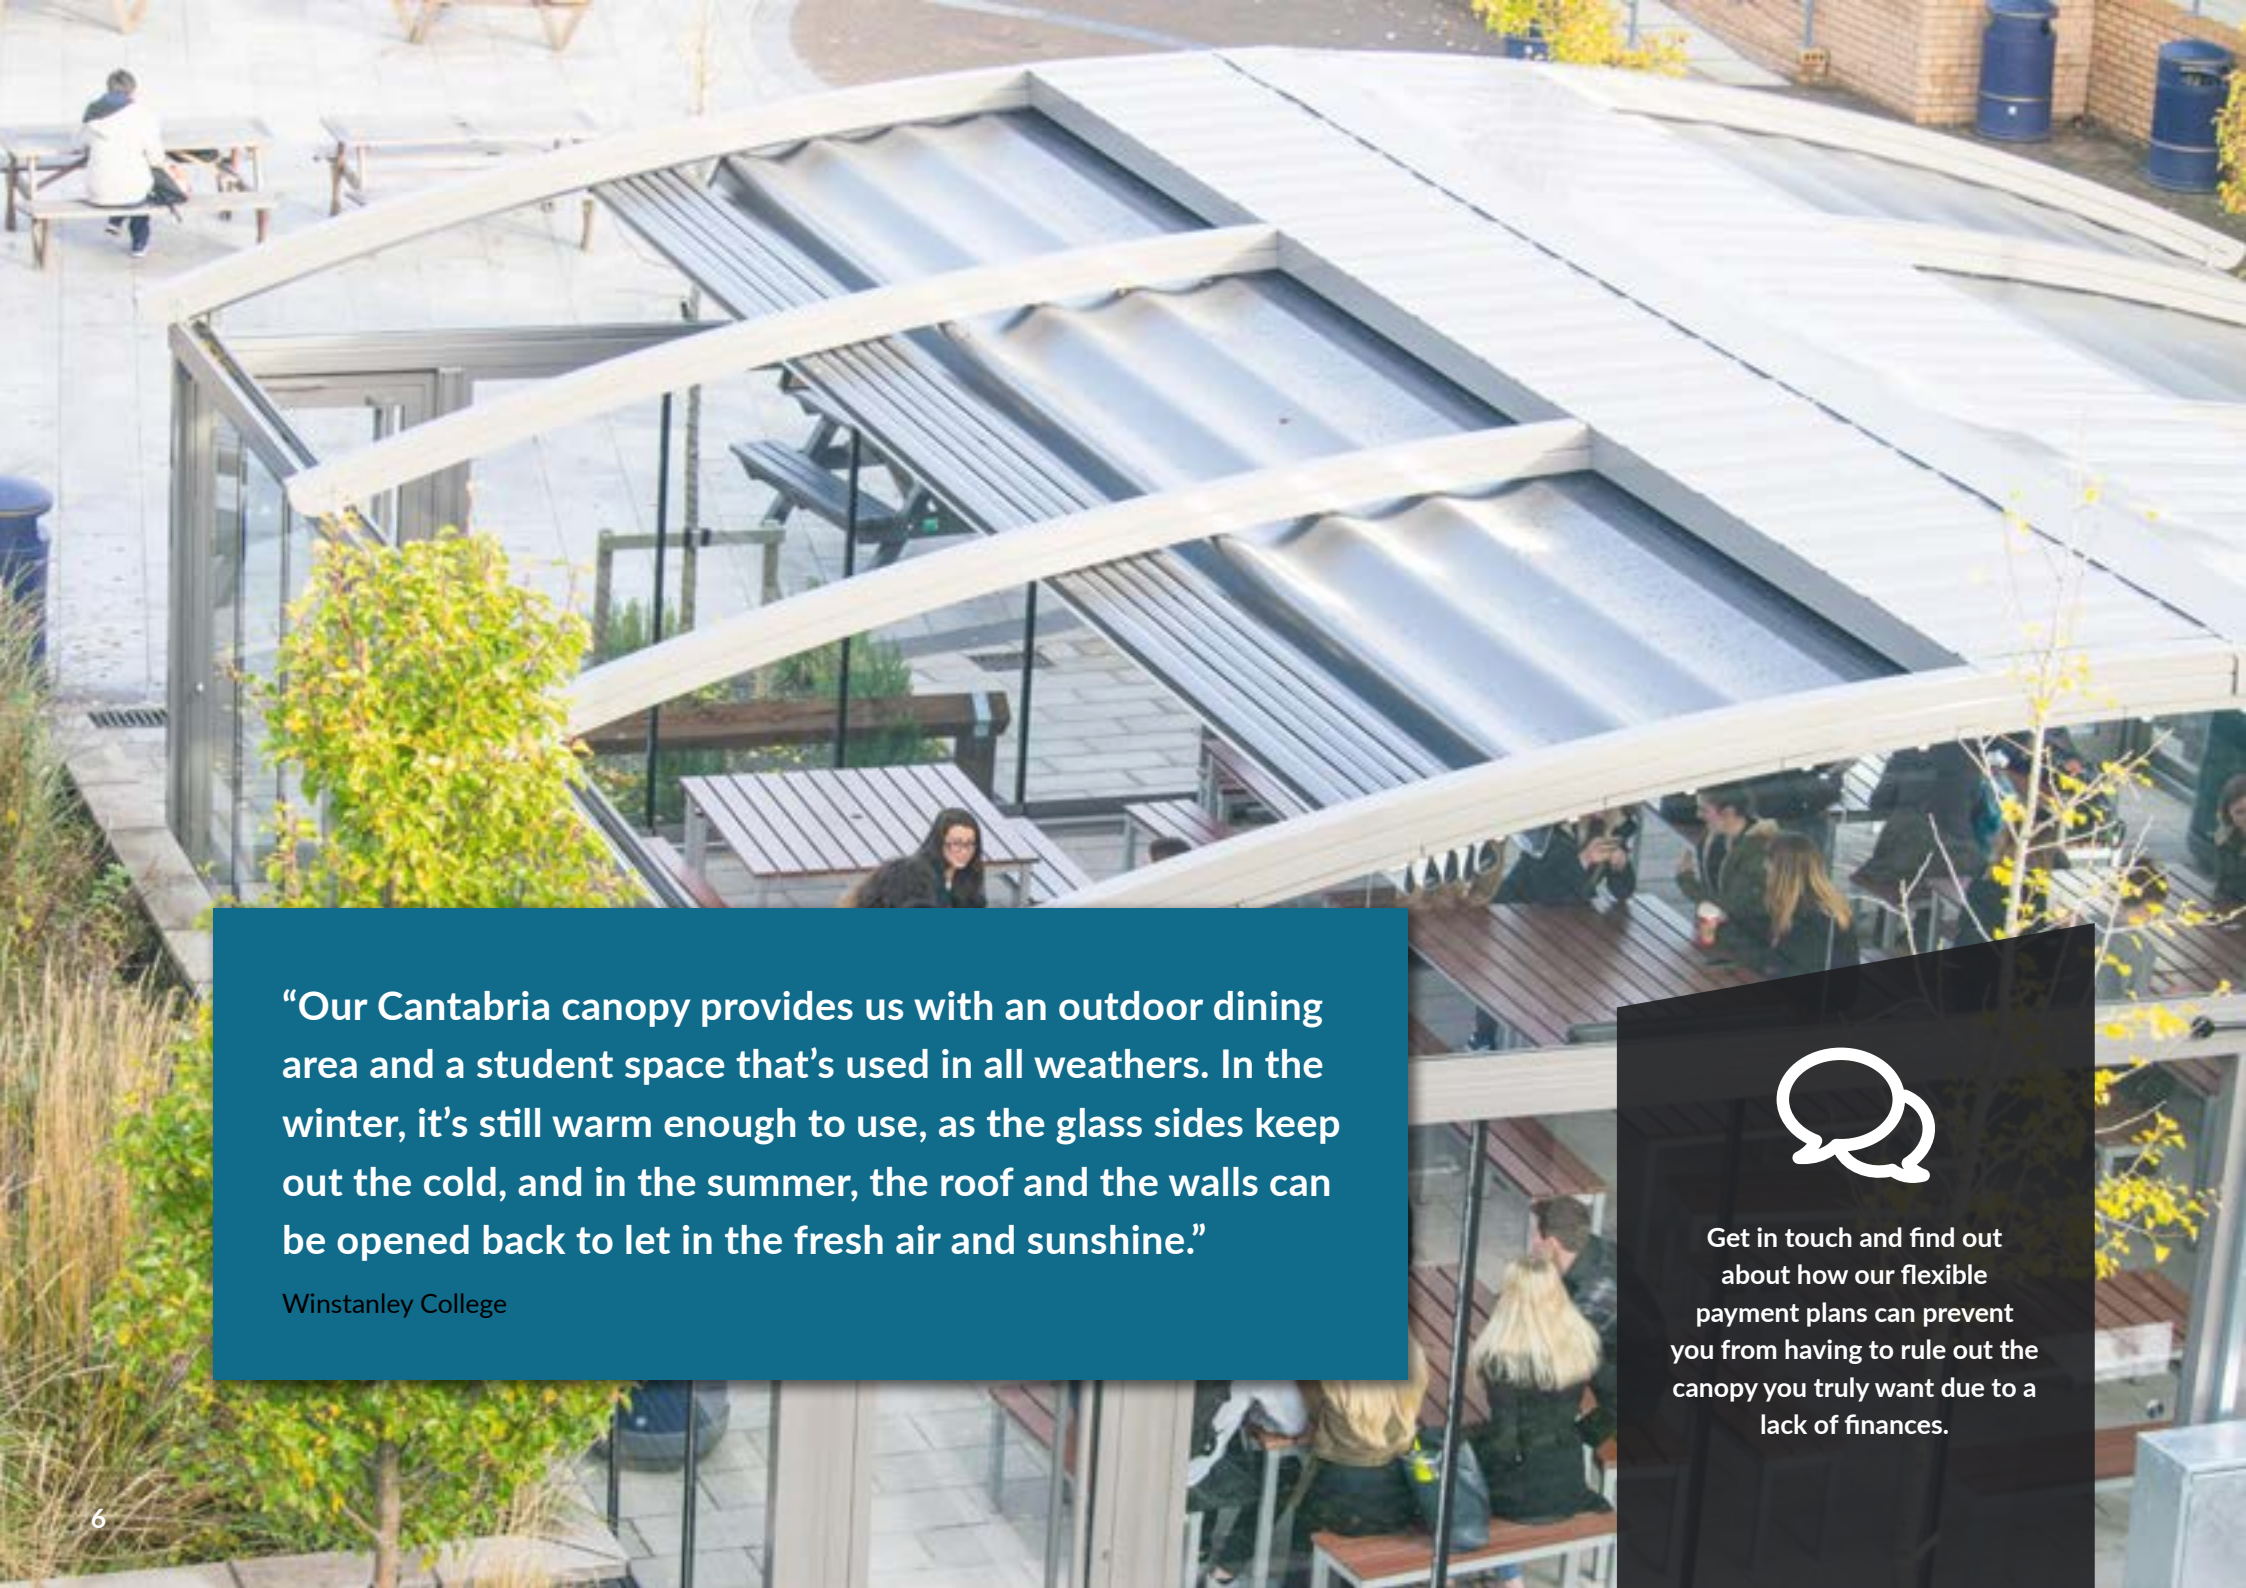

Crowded dining halls and a lack of outdoor shelter for lunchtimes cause problems for staff and kids. Make sure you have enough room to seat kids during lunch in every season, with an outdoor dining canopy. They are fitted freestanding or wall-mounted to your existing building.

Schools use dining canopies beyond lunchtimes. The rooms provide multipurpose space for lessons, studying, and events. The Cantabria canopy features a retractable roof and sides, with the option for heating and lighting, making it useful all year round.

**“Canopies UK arrived when they said they would and completed the job in one day, as opposed to the planned two. They did a good job, cleared up afterwards and were good to deal with.”**

Feltonfleet Preparatory School

“Our Cantabria canopy provides us with an outdoor dining area and a student space that’s used in all weathers. In the winter, it’s still warm enough to use, as the glass sides keep out the cold, and in the summer, the roof and the walls can be opened back to let in the fresh air and sunshine.”

Winstanley College

Get in touch and find out about how our flexible payment plans can prevent you from having to rule out the canopy you truly want due to a lack of finances.

# Creating playground shelter

## Safe, dry space for enjoying time outdoors

Getting outside for lessons and play improves kids' concentration and activity levels. Outdoor canopies remove the obstacle of the weather and help kids and staff get outside during every season. They can be colour matched to your branding or their surroundings.

Our Connekt canopy range features a cantilevered design and comes in any length. It can be installed wall mounted, without obstructing posts. The back-to-back Connekt system allows you to place shelter anywhere you need, to make use of key areas and wasted space.

**“We are so happy with how the canopies look. When I first came back to school after the installation and saw them in place, I was blown away. They are brilliant.”**

Susan Byiers, School Business Manager  
Wellington School

We've partnered with finance providers that work exclusively with the education sector. Leasing options are compliant with the regulations and advice given to schools and academies by the Department for Education.

# Shelter for the whole school day

## Protection from the elements

More than dining and play, canopies provide shelter for waiting, entrances, walkways, sports stands, car parking and bike locks. Any area you need to protect from the elements can be sheltered with an outdoor canopy, designed and built to fulfil your specific need.

## Features:

- ✓ Roof protects against harmful UV rays
- ✓ Site-specific calculations ensure canopies are safe
- ✓ Option to colour match using RAL codes
- ✓ No supporting posts on the front of Connekt
- ✓ Option for heating and lighting on Cantabria
- ✓ Wall-mounted and freestanding systems

**“I can’t recommend this company enough! From start to finish, they offered excellent service and did a fantastic job! We now have a colourful, rigid canopy shelter for our early years outside area. The guys who fitted it were very friendly, helpful and professional.”**

Ninfield Primary School

Many of our canopies come with a ten-year product, labour and installation guarantee, as standard.

Our sales and installation teams undergo full DBS checks so that they can work safely within a school environment.

If you'd like to get more from your outdoor space by creating shelter for outdoor play and learning, call our team on [01254 777 002](tel:01254777002) or email [info@canopiesuk.co.uk](mailto:info@canopiesuk.co.uk)
